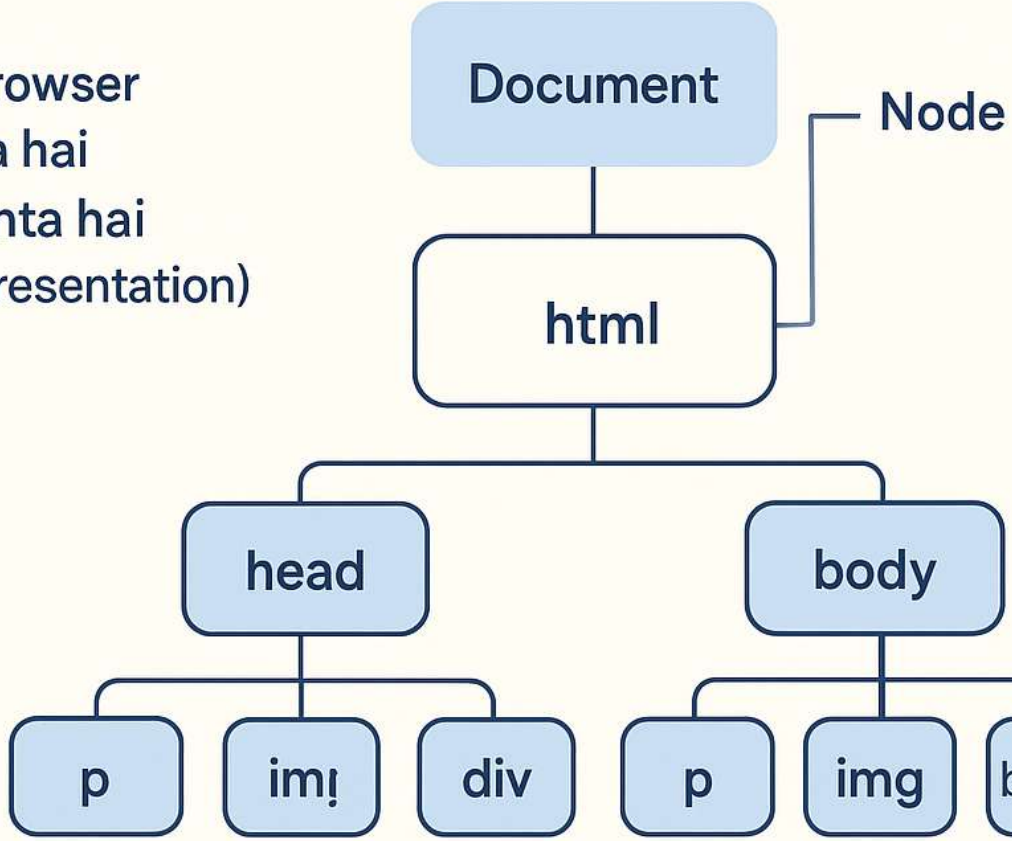
What is the DOM (Document Object Model)?

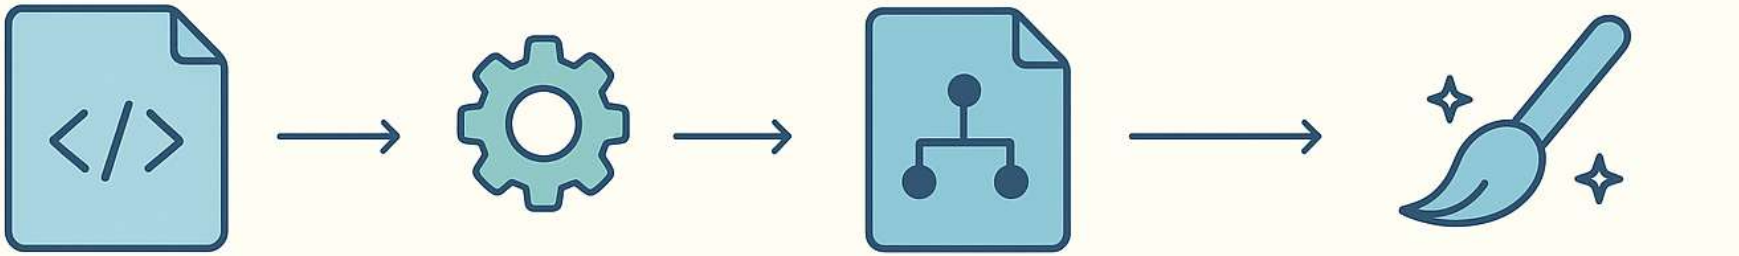
HTML → Browser parse karta hai
→ DOM banta hai
(object representation)



```
const el =
document.querySe-
lector('.btn');
el.textContent
= 'Click me';
```

JavaScript manipulates this tree to update the page — no page reload

How DOM Works



HTML
document

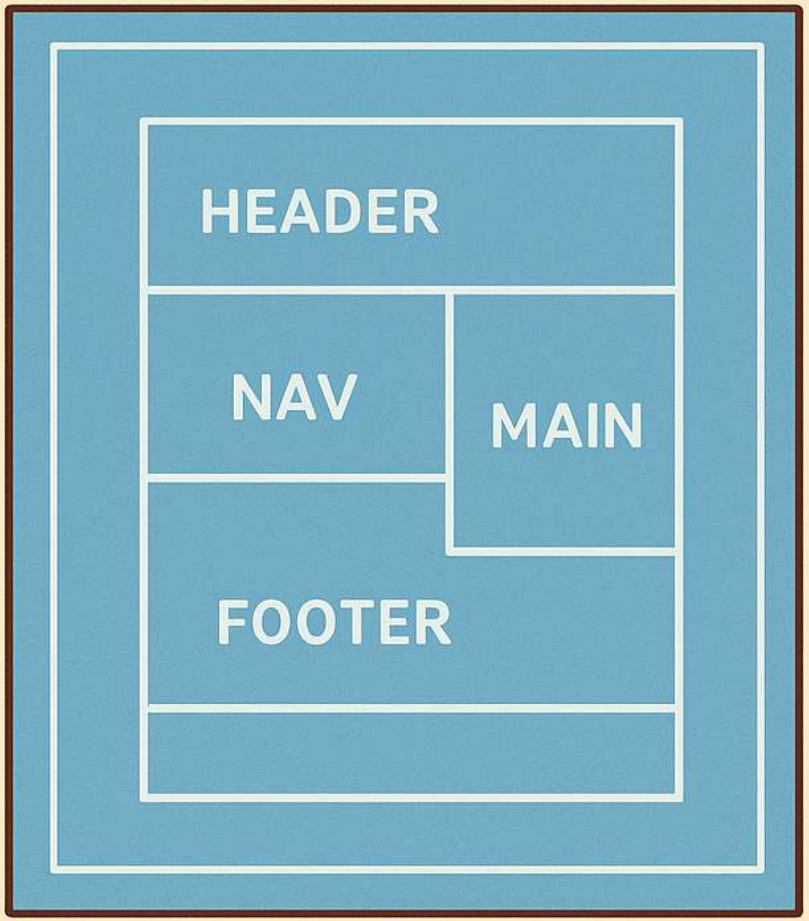
Parser
parses
HTML

JavaScript
Manipulates
DOM

Reflow / Repaint
Updates the page

```
document.getElementById('title').style.color = 'red';
```

HTML
= Building Plan



DOM
Memory Blueprint

JS = Handyman — changes things without rebuilding house
